Transcript - Deacon Brandon Dangers Of Ai

Chag Semeach and Shalom aleichem. I have a message today talking about *The Dangers of Artificial Intelligence*. So let's start by going to Matthew 24:4.

Matthew 24:4 *And answering, Yahshua said to them, See that no man deceives you.*

As the messages that we've heard so far by Elder Eric and Elder Don about AI, it has been made to deceive us. It is evil, it is wicked, and it's from Satan. So the things I'm about to tell you today are not my own opinions. They're not my own beliefs. These are the things that are happening right now, and they're so prevalent in every aspect of our lives, especially when you're on a smartphone or if you're using the internet.

So let's look at the definition of artificial intelligence. Artificial intelligence is technology that lets computers and/or machines copy human thinking, learning and problem-solving. You notice the word copy in there? That should be a red flag for all of Yahweh's people. Let's turn to Ecclesiastes chapter 9 verse 3, says:

Ecclesiastes 9:3 *This is an evil among all things that are done under the sun, that there is one event to all. Yea, also the heart of the sons of men is full of evil, and madness is in their heart while they are alive, and after that they go to the dead.*

So as we can see, man is evil. And matter of fact, it says *madness is in their heart*. And for the fact that we've created AI, that is madness. Okay? AI is being presented to the world as a tool for good. It's going to make people more efficient, more productive. It's going to heal the lame. It's going help the dumb people be able to talk. It's going to solve all the world's problems. However, it's actually created to manipulate us and to control us. Let's go to Genesis chapter 3 verse 1 … Genesis chapter 3 starting in verse 1:

Genesis 3:1-3 *And the serpent was cunning above every beast of the field which YAHWEH Elohim had made. And he said to the woman, Is it so that Elohim has said, You shall not eat from any tree of the garden? And the woman said to the serpent, of the fruit of the trees of the garden, We may eat, but of the fruit of the tree in the middle of the garden, Elohim has said, You shall not eat of it, nor shall you touch it, lest you die.*

Gen 3:4-6 *And the serpent said to the woman, surely, you shall not die, for Elohim knows that in the day you eat of it, even your eyes shall be opened, and you shall be as Elohim, knowing good and evil. And the woman saw that the tree was good for food, and that it was pleasant to the eyes, and the tree was desirable to make one wise. And she took of its fruit and ate; and she also gave to her husband with her, and he ate.*

So as we see here, it opened their eyes to what is good and evil. They can't determine what good and evil is because without Yahweh's Spirit ... we need His Spirit to determine what is good and to help us *do* good. AI, again, being a copy of what we do, what we think, how we are, is evil, okay? Interestingly, the first sentence says, "*And the serpent was cunning above every beast of the field which Yahweh Elohim had made*."

We could easily say AI was cunning above every invention that man has made. We've been talking a lot about mind control, so far over the feast. Another, word for mind control is brainwashing or manipulation. And you may think of mind control as if you've ever seen anybody under hypnosis or, or hypnotized they'll basically say or do anything that the hypnotist tells them to do. Sometimes they remember it, sometimes they don't. Well, AI is doing that to us and anyone on the internet, especially the smartphone, every single day.

So I'll read a couple of articles, the advancements of AI, how far they've come, to give you an idea of what's going on with AI. And again, this first one, it's called safety. It's for safety. So it says,

"In a striking leap towards safer self-driving cars, researchers at, at Texas A&M University College of Engineering and Korea Advanced Institute of Science & Technology have unveiled a new artificial intelligence system called **OmniPredict**. It predicts human pedestrian behaviors, tapping into the same technology that powers advanced chatbots, … we'll talk a little bit more about chatbots here a little bit later … and image recognition systems.

But instead of generating texts or describing images, it combines visual cues with contextual information to predict in real time what pedestrians are likely to do next."

And what were the AI's results? ”OmniPredict delivered a resounding sixty-seven percent accuracy in predicting human pedestrian behaviors."

This was last year, so I can just imagine how more advanced it is. In fact, they're already talking about using this predictive technology to use against humans if they feel that they're going to commit a crime. Think about that for a minute; the mind police - AI.

The second one we heard about in the video the other day is from the University of California, Berkeley, and Japan's NTT Communication Science Laboratories built an AI system that reads your mind. It's called **mind captioning**. Once trained, this AI system can look at a new brain scan and predict what the person is seeing, describing it in sentences that are startlingly accurate.

And the third one, it's a Silicon Valley start-up company called Sabi, and it's developed a **brain wearable** that decodes a person's internal speech into words on a computer screen. It says it's the first product. It's called a **brain-reading beanie**, which is like a little winter hat that you wear. They also say it will come in a baseball cap. The company has a venture capitalist, Vinod Khosla, who was an early investor of OpenAI, and he say, “a non-invasive wearable device is the only path to getting lots of people to use the brain-computer interface, or BCI technology.”

And this is what he says. The biggest and best application of BCI is if you can talk to your computer by thinking about it. If you're going to have a billion people use BCI for access to their computers every day, it cannot be invasive. They have this. They have other things. AI is everywhere, and they're getting us used to it. Just like they have rings that will monitor your heart, just like they have watches that will monitor your health, they're getting us used to these wearables, so we accept them and take them.

However, for years now, besides these physical things, every time you use your smartphone, every time you are on the internet, you are being monitored, you are being tracked, and businesses and companies are paying big dollars for all that information. Every app you accept, every cookie you accept on the website, even a loyalty card. Say you shop at a physical store and you swipe your loyalty card so you can get a discount.

That's all getting fed into AI systems **so they know you** and they can feed you the things that they want you to know, the things they want you to buy. Matter of fact, they've gotten so good at it, they are 80 to 83% accurate in determining the things that interest you, the things that cause you to have an emotion, and before you actually physically make that decision.

Elder Don's been warning about social media for years. They study what you click, how long you pause on a post, what makes you come back then they serve you exactly that. It's a new term called **feedback loop**. They find out what you like, they feed you more of those things, and they keep you engaged, engaged, engaged for hours and hours and hours. **Facebook** and **Google**, it is known and believed that they know you better than your family and your friends by your searches, by your purchases, by everything you do online.

Have you ever watched a **YouTube** video? Yep. Did you ever get sucked into an endless rabbit hole of other videos? That's all on purpose. They're feeding you your digital experience. It's subtly shaping the things you see, the things you believe, and then your emotions. Interestingly, did you know that YouTube is social media? Let me tell you things that classify something as social media. User profiles, check. Followers or subscribers, check. Comments, likes, shares, live streams, community posts, check, check, check. Every time you're going on YouTube, you're taking your mind - you're playing with fire, okay?

Have you ever done a search, say, for how to garden, and have ever been led to a website called **Reddit**? It's where people ask a question, and then other people answer and give them their answers and their feedbacks. Let me tell you what happened a little while ago. There was a recent experiment that involved **AI chatbots** posing as regular users on their website to see if they could subtly sway opinions on a variety of topics. In total, the chatbots submitted over 1,700 comments into Reddit threads without revealing that they were AI.

Do you know what they found? The chatbots were surprisingly good at convincing people to change their minds on a topic. According to the draft of the study, their comments were three to six times more persuasive than humans. Also, in March 2025, showed that OpenAI's ChatGPT 4.5, I think they're up to a better version now, could fool people into thinking that they were talking to a real person 73% of the time. Here's some unfortunate and more startling statistics.

Alarmingly, about 72% of U.S. teens say they use AI for companionship. 72% of U.S. teens use AI for companionship. They found that one in eight adolescents and young adults use AI for mental health. Sad! Chatbots, again, all this stuff is not my opinion, it's verified.
Chatbots have been connected to thirty-five deaths already. One-third of them are teenagers. Satan is coming after our children. If you have children, get them away from the smartphone and get them off the internet. Listen to this interesting fact.

Almost a third of practicing Christians either somewhat or strongly agree that spiritual advice coming from AI is as trustworthy as advice from their pastor. I don't know who these people's pastors are, but they need to find a new one. [laughing] This is crazy.

Microsoft. You can't really talk about technology and, and artificial intelligence without speaking about Microsoft. Up here you should see a slide. It says, "Discover and build with the latest MAI models. At Microsoft AI, our vision is humanist super intelligence. That means building world-class models that are, that are as safe as they are capable, made for the demands of real work, and designed not to outpace human potential, but to amplify it."

Again, they're presenting this as a tool for good, for humanist super intelligence. Do you notice the acronym they use, *MAI*? Elder Eric yesterday spoke about a lot of words in the English language that have like pagan things and evilness to it, like *cults* is in culture. *Live* is evil backwards, because people like to live how they want to live. Well, when you take MAI and you put it backwards you get 'I AM'. Satan is trying to counterfeit Yahweh through artificial intelligence.

AI can create things. It's made to make you believe things that are not true. Okay. And if you think that you can recognize something that's fake or real, I suggest you show up to youth meeting this afternoon and we'll have a test and see how you do. Okay. Let's turn to 1st John chapter 2 verse 15-18.

1st John 2:15 *Do not love the world nor the things in the world. If anyone loves the world, the love of the Father is not in him, because all that which is in the world: The lust of the flesh, the lust of the eyes, and the pride of life, is not of the Father, but is of the world. And the world is passing away, and its lust. But the one doing the will of Elohim abides forever. Little children, it is a last hour, and as you heard that the anti-Messiah is coming, even now many anti-Messiahs have risen up, from which you know that it is a last hour.*

We know it is the last hour, and we're told to turn away from the things of the world. **Proverbs 27:12**, you don't have to go there. It says, *A prudent man sees the evil coming and hides himself. The simple go on and are punished*. We're not simple. We're called to be prudent. We are Yahweh's children. The evil is coming. We need to hide ourselves and stay away from AI. So what should we do? **First, get rid of the smartphones.**

Oh, smartphone. I'll help you get rid of it. [smartphone smashing] Whoa. [smartphone smashing] You're welcome. Thanks.

Second thing we need to do is limit the internet. Seriously. I understand we have maybe banking we need to do or pay a bill online, whatever. Set strict discipline and parameters. Get on there, do what you have to do, then get off. **Third, reject everything about artificial intelligence and seek the wisdom of Yahweh**. Let's go to Jacob 1:5, where it talks about the wisdom of Yahweh and what we should do. Jacob 1:5 says:

Jacob 1:5 *But if any of you lacks wisdom, let him ask from Elohim, who gives to all freely and with grace, and it will be given to him.*

So Yahweh will give us the wisdom to understand, and to see, and to be aware. Okay? As I was doing this research, I stumbled upon a quote from a neuroscientist and a philosopher. Interestingly enough, he was also an atheist. And I'll read the quote he said, because it's truly for us as Yahweh's people. It says, "We face a grave peril from AI systems that

emulate people. These counterfeit people are the most dangerous artifacts in human history. Distracting and confusing us, and by exploiting our most irresistible fears and anxieties, will lead us into temptation, and from there into consenting to our own enslavement." This was an atheist. He saw the evilness of AI, an atheist. So what about us, Yahweh's people? Let's turn to Matthew chapter 26 verse 41.

Matthew 26:41 *Watch and pray, that you do not enter into temptation. The spirit indeed is ready, but the flesh is weak*.

We have Yahweh's spirit in us. His spirit can help us overcome anything. However, our flesh is weak. If we think we can dabble in AI and not be affected, we're kidding ourselves … we're kidding ourselves. Let's go to Luke chapter 11 verses 1-4.

Luke 11:1-2 *And it happened as He was praying in a certain place, when He finished, one of His disciples said to Him, Master teach us to pray, as John also taught his disciples. And He said to them: When you pray, say, Our Father who is in Heaven, hallowed be Your name, let Your kingdom come, let Your will be done on earth as it is in Heaven.*

Luke 11:3-4 *Give us our needed bread day by day* ... not week by week, not month by month, not year by year, but day by day ... *and forgive us our sins, for we ourselves also forgive everyone who offended us. And lead us not into trial, …* some translations say temptation … *but save us from the evil one.*

If we are exposing ourselves to AI with our smartphones on the internet willingly, Yahweh is not going to save us from the evil of that. I'm sorry, He's not going to. Okay, let's end with this verse. Jacob chapter 4 verse 7.

Jacob 4:7 *Then submit to YAHWEH. Resist the Devil, and he will flee from you.*

If we submit to Yahweh in everything, give up the smartphone, limit our internet, seek His wisdom, submit to Him in all judicial order and become the righteous servants that He's calling us to be, He will help us resist the devil. He will help us resist AI. He will help us get through the trials and tribulations that will come in this world, and *he* will flee from us.

So I hope I've opened your eyes. I hope Elder Eric has opened your eyes. I hope Elder Don has opened your eyes to the dangers of AI. I pray that Yahweh's people do not fall into temptations, and I pray that Yahweh saves us from the evil one who is behind it all.

Shalom aleichem.
